PROFFESIONAL EXPERIENCE

PHP Developer | 2023 – Present

MITE / AS4YOU

- Designed and developed a comprehensive Order Management System (OMS) in Symfony to handle the full order lifecycle (a solution functionally similar to BaseLinker).
- Implemented platform integrations with external services such as Allegro, DB Schenker, iMoje, and DPD.
- Automated invoice workflows and inventory synchronization by integrating the system with the database and Comarch ERP.
- Built custom e-commerce stores from scratch and developed dedicated product configurators (e.g., personalization for custom prints and engravings).
- Co-developed an ERP system (Frappe, Python) for the education sector, delivering proprietary modules for grant management, HR, and technical inspections.
- Refactored legacy code, significantly improving application performance and scalability.

Lead Developer | 2026 – Present

Freelance project for Esizayoo

- Designed the system architecture and led the development of the WorkTwin platform, a solution for managing the legal employment of foreign workers.
- Implemented a document validity monitoring system equipped with real-time notifications for HR coordinators.
- Created an automated matching module that aligns available workers with project requirements, streamlining staff assignment and contract generation.
- Designed a secure billing and payroll module that generates immutable snapshots of rates and data upon closing a billing cycle to ensure audit compliance.

SKILLS

Backend

- PHP, Symfony Mercure, Python, Frappe

Databases

- MySQL, Elasticsearch

Frontend

- Twig, JavaScript, Stimulus, Symfony Live Components, Symfony Turbo, React

DevOps

- Docker, Git, SigNoz, Sentry

Testing

- PHPUnit

Integrations

- Allegro, BaseLinker, iMoje, Przelewy24, MidOcean, iFirma, Google Cloud

EDUCATION

Poznan University of Technology (Politechnika Poznańska)

B.Sc. in Computer Science (Part-time studies) | 2023 – Present

LANGUAGES

Polski - native

English: C1 (Advanced)
